SOUTH CAROLINA

DOCKET NO. 95-1233-E - ORDER NO. 95-1749 ✓

DECEMBER 19, 1995

IN RE: Application of Carolina Power & Light)	ORDER
Company for Approval of Revised Area)	APPROVING
Lighting Service Schedule ALS-84A,)	REVISIONS
Revised Street Lighting Service Schedule)	
SLS-84A, and Revised Street Lighting)	
Service Regulations.)	

This matter comes before the Public Service Commission of South Carolina ("the Commission") on the Application filed by Carolina Power & Light Company ("CP&L") requesting approval of CP&L's revised Area Lighting Service Schedule ALS-84A, revised Street Lighting Service Schedule SLS-84A, and revised Street Lighting Service Regulations.

By its filing, CP&L proposes to add to Area Lighting Service Schedule ALS-84A the availability of a 110,000 lumen halide lighting fixture and the availability of a 39-foot tapered metal pole to meet the recommended normal mounting height of the 110,000 lumen halide light. The filing also proposes to add the availability of a 12-foot aluminum decorative post to Area Lighting Service Schedule ALS-84A and to Street Lighting Service Schedule SLS-84A.

CP&L also proposes to establish two new categories of nonstandard lighting facilities to be known as "Special Order

nonstandard" and "Custom Design nonstandard" and to incorporate longer contract periods under these new categories. CP&L also requests that it be allowed to incorporate longer contract periods (20 years) for nonstandard Street Lighting Service equipment provided to customers and asks approval to revise Provision 12 Termination of A Service Agreement of the Street Lighting Service Regulations to include a twenty year contract termination clause for nonstandard facilities.

Revisions are also requested to Provisions 4 and 5 of the Additional Facilities sections of the Schedules ALS and SLS, respectively, so that nonstandard metal poles and posts are considered as additional facilities instead of just metal poles requiring special construction or features. Lastly, CP&L requests a revision to the wording in the Street Lighting Service Regulations to reflect that special street lighting may be on a pole or post. Previously, the Street Lighting Service Regulations only made reference to a pole.

After review of the requested revisions proposed by CP&L to the Area Lighting Service Schedule ALS-84A, the Street Lighting Service Schedule SLS-84A, and the Street Lighting Service Regulations, the Commission believes that the proposed revisions should be, and hereby are, approved.

IT IS THEREFORE ORDERED THAT:

1. The revisions as proposed by CP&L, and as summarized above, to its Area Lighting Service Schedule ALS-84A, to its Street Lighting Service Schedule SLS-84A, and to its Street

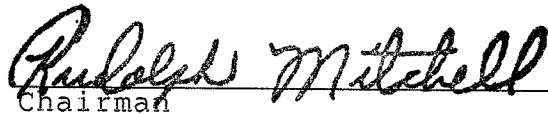

Lighting Service Regulations are approved.

2. The effective date of these revisions shall be January 1, 1996.

3. CP&L shall file an original and ten (10) copies of the approved schedules and regulations within ten (10) days of receipt of this Order.

4. This Order shall remain in full force and effect until further Order of the Commission.

BY ORDER OF THE COMMISSION:

Chairman
